# DOURAES

## THE DRINKER WHICH MAKES THE DIFFERENCE RIGHT FROM THE BEGINNING

### Ideal for starting poultry and game

- DOURAES in **version placed on the floor** is connected in series during the starting period to **complement the watering lines**, this allowing a better distribution of the watering points.
- The version placed on the floor **can be raised by a base** to avoid litter projections inside the drinking water and to adapt to the growth of the animals.
- DOURAES in **suspended version** is appropriate from starting until finishing.
- DOURAES is perfectly **adapted for free-range poultry** because of its very good tolerance to frost and of its resistance to U.V. rays.

### Simple and precise adjustment

- The water level is simply regulated thanks to **only one adjustable screw** located at the top of the float.
- **A precise and constant water level** is ensured inside the trough with a variation of only 1 to 2 mm. The water level remains constant, there is no risk that water gets cut, even in the event of strong pressure on the drinker caused by thirsty birds.

### Excellent water quality

- **The single design of the DOURAES drinker**, with its separation between the water trough and the float by a narrow canal, **avoids the float of getting polluted**. Even with a low water consumption, the canal avoids water from stagnating, thus the bacteria which could develop in the water trough are not directly in contact with the float.
- Contrary to a classic drinker with a constant water level, **a simple regular washing of the trough during the breeding cycle is enough** to have a water of quality without having to dismount the drinker.
- For a better hygiene of the water, DOURAES has a water arrival under the bell-cap **without contact to dust of the poultry house**.

### Technical characteristics

Highly resistant plastic assures strength

**Drinker** : diameter 35 cm

1 unit for **100 birds**

**Water output under the bell-cap**

**OPTIONAL :**

weight under drinker

Hose and connection kit

Suspension kit

Base to heighten : + 5 cm

Le Roy company is well known since more than 25 years for its patented technical innovations : Multibeck, Picorett...

The company offers a wide range of poultry housing equipment : automatic feeding lines, watering systems...
