# ROTATION SYSTEM FOR MULTIBECK® FEEDING LINES

## OPTIONAL

Multibeck feeders are tilted and held at 90°. This system offers time saving, and better working comfort.

### Easier cleaning

- ▶ A jet of water is sufficient to clean the feeders.
- ▶ Turning feeders allows for faster drying.
- ▶ Cleaning is faster and more efficient.

### Increased headspace

- ▶ The rotation at 90° allows for better circulation of the machines into the building (especially with low ceiling).

### Adaptable to short and extra-short versions of Multibeck

- ▶ This option can be applied for the short and extra-short versions of Multibeck.
- ▶ Easy and quick installation.

### Technical features

- Highly resistant plastic
- Locking lever
- Blocking device
- Rotation section
