OptiGROW

WATERING SYSTEM FOR POULTRY

New generation drinker

▶ **Low thread projection**

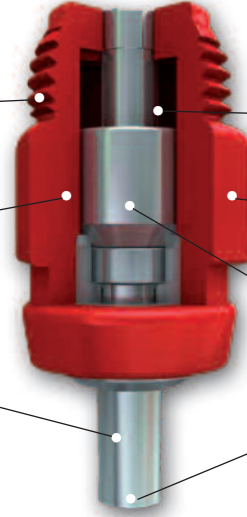

Less restriction of water flow for better flushing.

▶ **Increased wall thickness**

Thick walls offer a robust design and better chemical resistance.

▶ **Easy triggering**

Less triggering force gets day-old birds off to a fast start.

▶ **Hygienic surface**

The smooth inner surface avoid deposits and provide minimal friction for easier triggering.

▶ **Large body**

The large body provides a better visibility.

▶ **Heavy lid**

Allows a better waterproofness.

▶ **Large diameter pin**

The large diameter of the pin holds a large water drop.

Optimized for growth

▶ **Multidirectionnal drinker for a better start.**

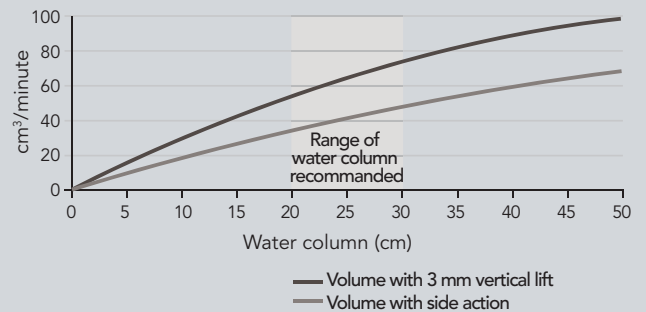

▶ **Flows adapted to every stage of the poultry's growth:**

- Easy movement of the triggering pin for day old birds.
- Large volume of water at the end.

Better poultry's quality

- ▶ **Water flow and litter respected.**
The poultry have all the water they need to develop.
- ▶ **Improved weight gains.**
- ▶ **Fewer undergrades birds.**

Nipple's flow
