MULTIBECK® EXTRA-SHORT VERSION

SPECIFIC FOR BROILERS

Less work at starting period

- ▶ **No spoiled feed = less digestives problems**
Multibeck prevents droppings on feed.
No contamination = less mortality and better performances
- ▶ **Better accessibility = less work**
20 chicks have access to the feed at the same time, twice more than with a classic pan feeder.
Additional starting equipment isn't necessary = 2 days of work less

Only a successful start at 8 days allows obtaining the best results!

Better technical results proven from the first flock

- ▶ **Unique design for better starting and easier finishing**
No necessity to adjust each pan feeder one by one.
- ▶ **Convertible to turkey version.**

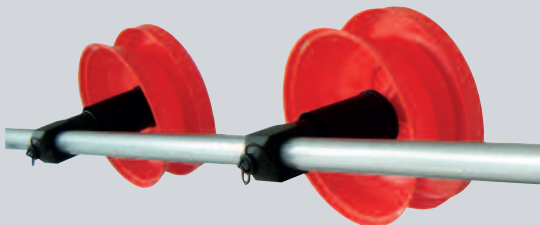

Anti wastage design

- ▶ **Narrow trough = impossibility to sort**
Broilers can't remove feed = no wastage
- ▶ **No barrier effect = better circulation**
No shocks against the grids and the feeder line.
Less bruising and damaged wings = more money

Considered by poultry farmers as an indispensable equipment!

Easy cleaning = less work

- ▶ No disassembly, even in low rise building.
"Simplified work with optimum performances"
(Filières Avicoles)
- ▶ **NEW ROTATION OPTION:**
Multibeck pan feeders are tilted at 90° and maintained by a special blocking device allowing for easy washing and better circulation of motorized equipment.

Technical features

- **Pan feeder:** Ø32cm, depth 4,2cm
- **Height of the feeder under the pipe:** 24cm
- **Material:** Very high resistant plastic for an intensive and repetitive use
- **Diameter of feeding pipe:** standard 45mm (possible until 51mm)
- **Lid for pan feeder** (in option)
