MULTIBECK®

SHORT VERSION - DUCK APPLICATION

SUCCESSFUL VERSATILITY FROM START TO FINISH

SUCCESSFUL START AND LIMITS THE USE OF ANTIBIOTICS

Better accessibility from day one

► 20 chicks have access to the feed at the same time.

Less work during the starting period ► reduce the needs of starting feeder.

Avoid chicks to enter in the pan and contaminate the feed ► preserves feed quality.

BETTER CIRCULATION AND OPTIMAL ACCESSIBILITY

Periphery of low pan feeder = feed periphery
► optimal access for feed.

Smooth circulation between pan feeders
► no barrier effect.

Flexible drop pipe = less bruising ► less losses and seizures.

SUCCESSFUL VERSATILITY

Lower pan ► specific for starting.

Upper pan ► specific for transition and finishing.

For better feed conversion ► lower and upper pans are designed to prevent wastage.

Installation of the collar without removing the pan feeder.

No need to change the pan during the growing period or a change of production.

UPPER PAN FEEDER WITH COLLAR

LOWER AND UPPER PAN FEEDER

UPPER PAN FEEDER

EASY CLEANING = LESS WORK

No dismantling, even in low ceiling.

PATENTED INNOVATION

ROTATION OPTION

Multibeck® feed pans are simultaneously tilted by 90° and held in place by a blocker.

Fast washing and less space required.

TECHNICAL CHARACTERISTICS

Strong resistant plastic and flexible suspension system ensure robustness.

- Lower pan : Ø 32 cm, depth 4.2 cm
- Upper pan : Ø 29 cm, depth 9.5 cm
- With anti-wastage collar : Ø 40 cm, depth 14.5 cm
- Height of feed pan under the pipe : 45 cm
- Height of feed pan hanging under the pipe : 32 cm
