MULTIBECK® SHORT VERSION

TWO PAN FEEDERS IN ONE TO OPTIMIZE PERFORMANCES

**More hygiene, less work,
less bruising**

- ▶ **Multibeck avoids droppings on feed**
It prevents chicks from entering the plate and contaminate the food.
- ▶ **Better accessibility = less work**
20 chicks have access to the feed at the same time, twice more than with a classic pan feeder.
- ▶ **Less time lost at the starting period** to fill the pan feeders because Multibeck facilitates access to food.

- ▶ **Collar for turkey or ducks and grill for guinea fowls can be installed without removing the pan feeder.**
- ▶ **The flexible suspension system prevents bruising** in case of shock.
- ▶ **Improves food's hygiene and reduces the workload.**

Easy cleaning

- ▶ During the cleaning Multibeck can stay in the building remaining hanging under the feed line.
- ▶ **NEW ROTATION OPTION:**
Multibeck pan feeders are tilted at 90° and maintained by a special blocking device allowing for easy washing and better circulation of motorized equipment.

PATENTED INNOVATION

**Upper pan feeder
with collar**

**Lower + upper
pan feeder**

Upper pan feeder

Successful versatility

- ▶ **Lower pan** specific for starting of all poultry and finishing broilers.
- ▶ **Upper pan** specific for turkey or duck's transition and finishing.
- ▶ **For better feed conversion**, upper and lower pan are designed to prevent wastage.
- ▶ **No need to change the pan** during the growing period or a change of production.

Technical features

- **Material:** Very high resistant plastic for an intensive and repetitive use.
- **Lower pan:** Ø32cm, depth 4,2cm.
- **Upper pan:** Ø29cm, depth 9,5cm.
- **With collar:** Ø40cm, depth 14,5cm
- **Height of the feeder under the pipe:** 45cm.
- **Height of the feeder hanging under the pipe:** 32cm.
